

Our goal at Village Green Elementary is to prepare our students academically, socially, and emotionally in a positive and safe learning environment. We strive to provide them with the knowledge and skills necessary to think critically and make decisions in a multicultural and technologically evolving world. Our aim is also to empower students to meet the challenges of citizenship in the 21<sup>st</sup> century by promoting self-confidence, self-respect, and respect for rights of others.

We encourage students to think globally and to develop decision-making skills through problem-solving techniques. They are taught conflict resolution skills in order to foster cooperation, and we encourage creativity and independent critical analysis. Lastly, our school is committed to preparing students to become successful and contributing citizens in our continuing changing world.
